

Establishing

Learning objectives as part of a learning plan

Agreeing a learning plan with the learner is key to planning a positive experience and should include:

- Learning objectives that reflect the knowledge needed, the level of performance required as well as the attitudes/ values the learner should display.
- Understanding of the learner's assessment requirements must be evident.
- Understanding of individual's learning needs and the appropriate and available learning opportunities
- Setting clear and realistic timescales with the learner with planned opportunities for discussion, evaluation and feedback?

Reflect on an initial interview you recently conducted. Did you consider the above areas in agreeing a learning plan for the placement? How might you enhance your future practice?
